Sun Parakeets Will Drive You Crazy

It's great that you are reading another edition. This year is ending and we all are looking forward to a well-deserved rest.

In this edition you will find the second part about Red-rumped Parakeets by Louis Bothma. As foster parents the Red-rumps have no equal. Providing housing for these parakeets is quite straightforward.

Kashmir Csaky explains about Respiratory Infections. The symptoms are different for upper respiratory and lower respiratory problems.

Rev. Dr. LoraKim Joyner has a great article about Sun Parakeets. She starts off with: "When we first started studying sun parakeets in Guyana we thought it would be a slam dunk - just repeat nest and population monitoring as in every other parrot project I have ever worked in to get the desired results."

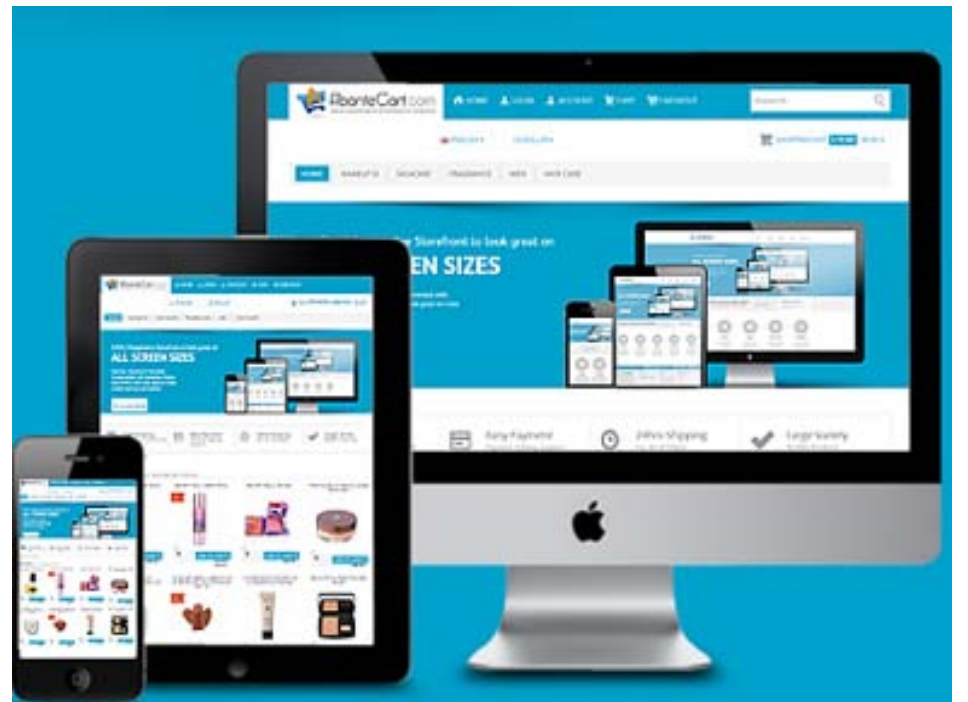

You can subscribe to the Premier edition to read these great articles. Remember that you can subscribe monthly, six-monthly and yearly. There are very easy subscription links for all countries on our website.

Why not go birding this upcoming festive season? In South Africa you can visit Gulu Private Resort in East London. Or you can even go to Mexico with Birding Los Cabos.

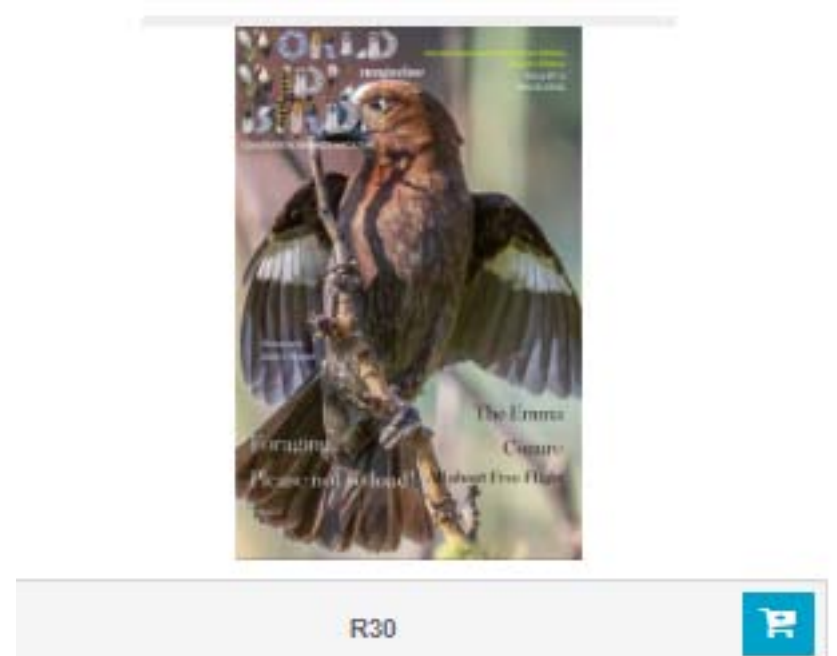

Happy reading. You can look forward to another valuable edition in December.

Petrus Albertus van Tonder and  
The World Wide Birds team

AUTOMATIC EGG INCUBATORS - PEFECT FOR PARROTS

Brinsea Mini II and Maxi II incubators

Small capacity without compromise.

Parrot and other exotic bird breeders demand an incubator capable of handling delicate eggs that may need very frequent turning along with extremely precise control of humidity and temperature.

Mini II and Maxi II – features

### **About Our Organization**

The Bird Gardens of Naples is a non-profit organization whose sole concern is parrot welfare in captivity and conservation of wild parrots. We are an outreach and placement program which places into safe custody, parrots which are abandoned, abused, or in need of a home for any reason. Parrots are intelligent, highly social and complex beings with lifespans of up to 100 years.

The individual bird's best interest and well being of the present flock will determine if a parrot is accepted into the organization. We actively support networking with other parrot welfare groups, animal welfare organizations, the veterinary community, conservation organizations and the general public. Education is of the utmost importance concerning the well being of a parrot and its ability to successfully live with its human companions.

### **Visit The Bird Gardens of Naples**

The Bird Gardens of Naples is located in the green space of Corkscrew Swamp with a variety of flora, fauna, bees, and butterflies. You will have the opportunity to see, learn, and interact with 100+ birds from origins around the world. If weather allows, groups can enter our large macaw aviary with opportunities to take photos and hold birds. Our guided tours last approximately two hours. Please bring sunscreen, bug spray, and comfortable walking shoes.

Also feel free to bring unsalted nuts to feed the birds, however, no peanuts as they cause diseases in birds. For safety purposes, please stay on the trail and with your tour guide at all times. If you need to leave early, please advise your tour guide. All guided tours begin promptly 15 minutes after the scheduled time. Our gates open 15 minutes before tours and close 15 minutes after, allowing a 30-minute window for all visitors to arrive. Once the gate closes and the tour begins, late visitors will not be allowed in. Please check our address prior to your scheduled tour to ensure enough time for travel.

We do not charge a fee for our educational tours, but donations are greatly appreciated and go along way to help our charity keep the birds happy and healthy.

## Parrot Behavior Consulting (PBC) by Hildegard Niemann

**New at Parrot Behavior Consulting (PBC): Instructional videos about parrots and parakeets on demand (on-demand) on the online video platform Udemy.**

Did you miss any of the webinars? No problem, we've recorded a number of webinars for you!

Parrot Behavior Consulting's webinar series is growing in popularity among parrot enthusiasts. Since 2016, viewers have been meeting online to find out about various current topics for 90 minutes. If you only became aware of the webinars later or if you missed one or the other webinar because you were unable to attend on the day of the live presentation, you now have the opportunity to record the 90 minutes in a private demonstration via the Easymeet- Watch Hildegard Niemann's online channel (at a price of 30 euros). It is the original recording of the respective webinar, in which interaction is of course no longer possible.

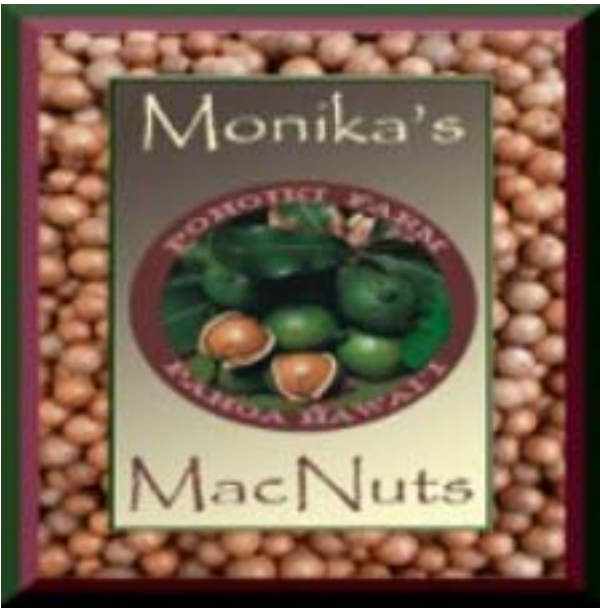

The course purchased includes: 1 to 1.5 hours of on-demand video, unrestricted lifetime access, access to cell phone / tablet and TV, and a certificate of completion. Further courses are already in preparation. We are pleased to be able to present you with these on-demand videos a new training segment as part of the Parrot Behavior Consulting offer and look forward to your first visit to Udemy.

**Monika's Mac Nuts**  
**In Shell Premium Macadamia Nuts**  
**100% Pesticide Free**  
**Grown On The Big Island of Hawaii**

Our In Shell Mac Nuts are preferred by birds especially Hyacinth Macaws as well as people with a desire for a high quality, fresh tasting, nutritious nut.

Monika's Mac Nuts are grown on our family farm on the Big Island. Our Macadamia Nuts are preferred by Birds especially Hyacinth Macaws. Macaw birds love our Mac Nuts! Our Macadamia Nuts are also great for people who are on a raw food diet. Our Nuts are always naturally air dried...never cooked (cooking robs the nuts of flavor and nutrition). Our nuts are 100% pesticide free.

We sell our mac nuts in quantities starting as small as 1 lb up to over 100 lbs. We also offer a subscription program through our website <https://www.mac-nuts.com/> where you can choose the quantity and frequency of your order.

Click on photo to visit Facebook page.

Here is one of our gorgeous customers Okalani! She loves our mac nuts!

These are a couple of our adorable customers Grover and Beaky!

# Lady Gouldian Finch

## Common Mutations

Normal "Wild Type"

### Yellow Headed Normal

Orange ("yellow") mask instead of a red one. This mutation is rare in the wild.

### White Breasted

Purple chest is replaced by white; this mutation can occur in combination with any other color mutation listed here, except for pastel and dilute cocks which always have a purple breast.

### Black Headed Normal

Black mask instead of a red one. This mutation is the most common in the wild.

### Yellow-Bodied

Red, yellow, or off-white mask, off-white outline around the mask, yellow back, off-white tail, purple breast (or white breast if the bird is white breasted), yellow abdomen. (Black and blue markings are reduced as to be essentially white in this mutation)

### Blue-Bodied

Salmon or black mask with a black outline followed by a blue border, blue back, off-white abdomen, black and blue tail, and a purple breast (or a white breast if the bird is white breasted)

### Dilute

Red, yellow, or gray mask, gray outline around the mask, blue border around the gray outline, pale green back, blue and gray tail, purple breast, yellow abdomen. mutation occurs in males ONLY

### Silver

Salmon or off-white mask, off-white back, off-white tail, off-white abdomen, purple breast (or white breast if the bird is white breasted) also called "Pastel Blue."

### Pastel

Salmon or gray mask, gray outline around the mask, blue border around the gray outline, pale blue back, blue and gray tail, purple breast (cannot be white breasted!), off-white abdomen. (Yellow and red colorations are partially reduced in this mutation). This mutation occurs in males ONLY!

# Feather Tails Therapies

## Australia

By: Karen Davis  
Hi guys.

Karen and Roy here from FEATHER TAIL THERAPIES. We have had to undergo a few changes and have also changed premises so lots of new and exciting things to keep track of.

Firstly our Deception Bay business has relocated to Murgon in the South Burnett region of Queensland Australia. We now have 20 acres of land to allow for plenty of upgrades and expansions as time goes on. We have also expanded from solely training therapy birds into a Sanctuary for the many unwanted parrots that need a new chance at life.

The most famous of these would be Jackson a Sulphur Cockatoo who had his wings permanently damaged by a dog at a young age.

Please click on photo to help us.

He also hates men. However with time and patience Roy's 15yr old daughter Tamie has become his human and is rapidly developing to become not just her therapy bird but the mascot of the new Sanctuary as well.

Our aged care visits were suspended due to Covid regulations however we still provide therapy birds to the aged care centres to keep the residents happy.

More news to come in subsequent editions so Thank you for your support and watch this space for further developments.

Please click on photo to visit our Facebook group.

## **Safari West**

### **Community Shoutout: Point Blue's STRAW Watershed Week!**

In 1992, Laurette Roger's 4th grade class learned about the plight of the California Freshwater Shrimp, an endangered species only found in a few sections of stream in Sonoma, Napa, and Marin counties. They were sad about the disappearance of a unique form of life so close to home, and wanted to help. So, they formed the Shrimp Club: a student-led group aimed at educating the public, making connections with landowners, and restoring the waterways that these shrimp call home.

The Shrimp Club went on to be one of the most successful class projects in the state, raising more than \$100,000 over the course of a few years and protecting a large portion of California Freshwater Shrimp habitat! As the project continued to expand, it was picked up by two local non-profit organizations in 1998 and was renamed to STRAW: Students & Teachers Restore a Watershed. STRAW is now run by Point Blue, a conservation research and education non-profit based in Petaluma, California.

Since 1992, the Shrimp Club and STRAW have completed more than 750 watershed restoration projects over 42 miles of creek banks, empowering more than 300 teachers and 50,000 students to help conserve their local waterways.

Along with this amazing work, STRAW also hosts an annual workshop for teachers, called Watershed Week. At Watershed Week, teachers learn about a new aspect of local ecology and conservation education each year, and have the opportunity to network and share ideas with dozens of other teachers from around the bay area. Safari West's Conservation & Outreach Manager Marie and Conservation Writer Mark were given the opportunity to attend this year!

The theme of this year's Watershed Week was pollinators! It would be impossible to condense two days worth of fantastic information into a short paragraph, but here are a few of our favorite new things we learned:

## Jedi - Part 12

By: Kashmir Csaky

October 14, 2022

On the 9th after I posted about Jedi we took her outside for some fresh air and sunshine. When we got to the end of our 300 foot driveway a car drove towards us. This was the first time she had ever seen a car. A huge loud monster with a half digested human in it. She was terrified! She flapped her wings, bit into my husband's shoulder, but not hard enough to do any damage and flatten herself next to his head. The three of us stood there like deer in headlights. The man in the car obviously wanted to ask us about her, but just asked if we had a view of the river. He said he lived nearby, yet the street said he lives is miles away.

He drove away and we put Jedi on the ground. It was one of the few times she had been on the ground outside.

## Beginning of the resting period for parrots

By: Rafael Zamora Padrón  
Scientific Director  
Loro Parque Fundación

Red-capped Parrot  
at Loro Parque Fundación.  
M.Pérez/LPF

At the end of summer in the European latitude there are many parrot species that have already finished their reproductive cycle. This is the case with the genus *Psittacula*. They seem to have a precise internal clock that makes them stop the breeding process synchronously in almost all species. Although there are always exceptions of a couple that seems to continue, they usually start the resting period.

A very important process that we remind our readers every year so that they give it the attention it needs. Knowing how to understand this pause is fundamental for the next season. The rest does not mean that we stop paying attention to them. On the contrary, we must use this time to change their diet and increase hygiene and start preparing for winter.

Association for Wild-type and Exhibition Budgies of South Africa

AWEBSA is the only National Body in Southern Africa catering for all budgerigars (Exhibition / Wild-Type / Pet Budgies) at our Shows. We also have an Open class where members and non-members show. Exhibition and Wild-Type budgerigars are treated on an equal footing with 25 colour awards each available per show. We invite you to join us and enjoy our wonderful hobby with us.

PDF downloads about each of these diseases are available on the website.  
Click on screenshot to access.

Do you ever wonder what all the supplements and little dietary extras actually do for your bird?

Pet birds do not get the opportunity to search for food outside as they would in their native environment. Foraging allows a bird to feed selectively and to supplement its diet in the event of the nutritional balance of the diet being inadequate. The captive bird is therefore dependent on its owner to provide a complete and balanced diet. This places a heavy responsibility on the owner to supply an adequate, balanced diet.

Confusion may occur when nutritional knowledge is transferred between species: what is good for humans is not always good for birds. This article is not intended to be a complete guide to budgie feeding but aims to give budgerigar breeders more background so they are able to make informed decisions about their own aviary nutrition.

# Avifood Products

By Dr. med. vet. Friedrich Janeczek,  
Veterinary practice limited to Parrots,  
Graefelfing, Germany

## How do you recognize well-fed young Hyacinth macaws?

It is well known that the quality and composition of the diet for young birds affect the condition of their feathers, skin and beak. This can be seen particularly well in young hyacinth macaws. Poorly and unbalanced nourished young Hyacinth macaws have blackish, dull plumage and pale, sometimes almost whitish skin around the eyes and the lower beak.

The young Hyacinth macaw pictured here is approximately 7 months old and not fully weaned. It has bright blue and shiny plumage and perfect toe skin without hyperkeratosis. Its skin around the eyes is an intense yellow color.

The parents of this bird are fed with Harrison's® High Potency coarse mixed with Palmgloss® and the Harrison's® Power Treats.

# AVIFOOD®

## Harrison's®

Premium Quality organic bird food available since 1991

### Avifood Careline

Care and wellness products für birds

Avifood, Dipl. Stat. (Univ.) Monika Janeczek e.K.

AVIJAN OHG, [www.avijan.com](http://www.avijan.com), Email: [info@avijan.com](mailto:info@avijan.com), Phone +49-89-854-9000

We congratulate our customer to this beautiful young macaw and wish continued success in the next breeding season!

These wonderful Hyacinth macaw progenies can be shipped to all countries which allow the import of captive bred CITES Appendix I species in F2 generation.

Both Hyacinth macaws can be exported in special transport boxes according to the IATA regulations accompanied with CITES export permit, veterinary health certificate and negative test results for avian influenza and Newcastle disease.

Interested persons who have the appropriate facilities to keep Hyacinth macaws should send an email to [info@dr-janeczek.de](mailto:info@dr-janeczek.de).

I travel a lot to visit our customers and their parrots to check and treat them at their homes. The specialized veterinary video consultations for parrots and parakeets we offer help a lot to get a first impression about the birds and their situation as well as the bird owners problems.

Some cases like nutritional issues can be already solved during the video consultation. However, most cases require thorough diagnostic and therapeutic measures, which I carry out in my veterinary practice limited to parrots at Graefelfing, Germany or as part of my home visits at the customer's location.

CITES BIRDS  
AVES

After downloading the full Index of CITES species, I came to the conclusion that this 1287 page document is not that easy to browse through. I then decided to make it easier for our readers and list them as follow with a photo from Wiki-  
pedia.

An easy explanation on the Cites website of what the listings mean:  
<https://www.cites.org/eng/disc/how.php>

**In summary:**  
**Appendix I** includes species threatened with extinction. Trade in specimens of these species is permitted only in exceptional circumstances.

**Appendix II** includes species not necessarily threatened with extinction, but in which trade must be controlled in order to avoid utilization incompatible with their survival.

**Appendix III** This Appendix contains species that are protected in at least one country.

Laughing falcon  
Colombia and  
Ecuador  
**Cites II**

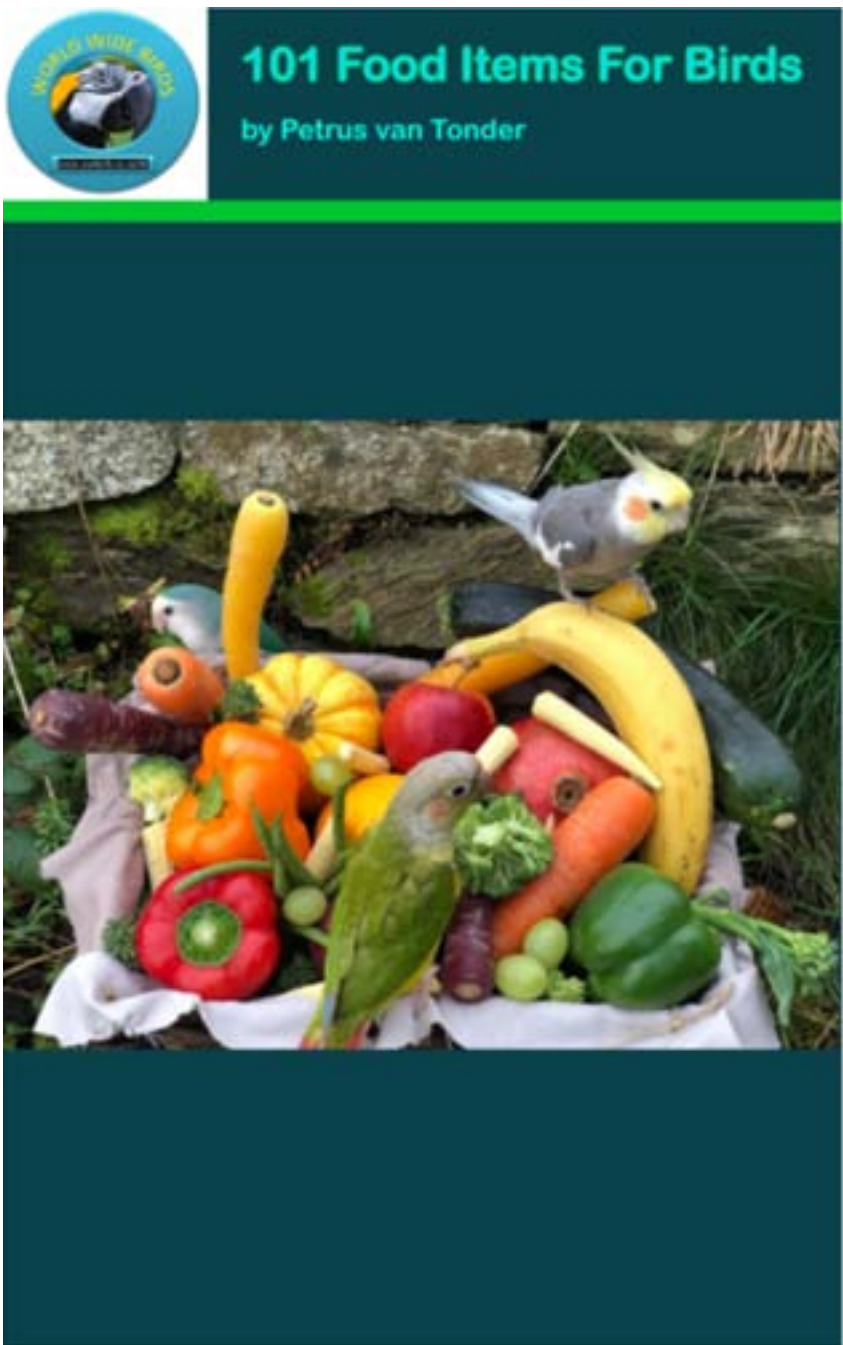

Heteroglaux blewitti  
Forest owlet  
India  
**Cites I**

**Two pages of Cites Birds in every  
Premier edition.**

Click on below cover photo for more info:

Your book is very interesting. I like that you added the latin names that everybody in all countries knows exactly which plant is meant.

The article from Tony Silva is absolutely informative.

Once again many thanks for the book.

Best regards,

Diana Eberhardt

## Seabird Conservation

Seabirds (and waterfowl) are the only animals that have conquered the sea, land and sky. Over twenty species of seabirds live in the Caribbean, and many more visit every year.

Seabirds spend most of their lives on or over the sea, foraging, feeding or resting. They are highly adapted to this unique way of life. Many have webbed feet (to help them swim and dive), waterproofed feathers (to keep them warm and afloat), salt glands (that allow them to excrete the salt from the seawater they drink), and acute vision, a strong sense of smell and sharp bills (to help them find and catch food). Their long wings support them while travelling over the oceans in search of food and, on land, living in colonies helps to protect them from predators.

Before humans lived in the Caribbean (~7,000 years ago), the islands supported vast numbers of seabirds. On many islands, there were so many that their droppings (called guano) formed piles hundreds of feet high, and were mined for fertilizer. Today, tropical seabirds, like those in other areas of the world, are threatened by human activities. In fact, seabirds are now one of the most threatened groups of birds in the world. Many colonies are declining in size and some have disappeared.

On land, introduced rats, cats and dogs prey on eggs, chicks and even adults. In some parts of the Caribbean, humans still take eggs, chicks and adults for food and aphrodisiacs.

Coastal development and sea level rise destroy and damage nesting habitat. Even the oceans are no longer safe. Seabirds often feed around fishing boats, and are caught and die in fishing gear. Overfishing, pollution and climate change have depleted their food sources. Hungry seabirds mistake floating plastic for food and fill their bellies with trash. Heavy metals from marine pollution also accumulate in their bodies.

Caribbean seabirds have much to teach us about the health of the seas around our islands. We need to understand their ecology, so we can protect them, their habitats, and the marine resource on which we all depend. Unfortunately, there have been only a few studies on seabirds in the Caribbean. This is partly because of the many practical difficulties in studying them, but they are also less attractive to funders than accessible land birds and migrants, and other mobile marine animals like sharks and turtles.

For most seabirds, the Caribbean is one large connected habitat. Therefore, it is important for scientists and conservationists across the region to work together to understand the big picture. This was first recognized in 1998, when we formed the Caribbean Seabird Working Group. Healthy seabird populations are possible in the Caribbean, but we must all work together to understand, manage and protect them.

# Harrison's Bird Foods

## HIGH POTENCY COARSE

The optimum food for the health and longevity of your medium to Large birds\*.

\*High Potency is additionally the suggested year-round formula for the following species: African Grey parrots, cockatoos, large conures, and macaws.

### USES:

**CONVERSION TO HARRISON'S:** All birds should start out and remain on High Potency formula for a period of at least 6 months at approximately 70% of the total diet. Switch large birds (other than African Grey parrots, cockatoos, large conures and macaws) to Adult Lifetime formula after a 6-month introductory period.

**BREEDING BIRDS:** High Potency formula should be fed 1-2 months prior to the breeding period and continued until the chicks are weaned or for at least 6 months before resuming Adult Lifetime formula.

**WEANING BIRDS:** High Potency formula should be fed to weaning birds for at least 6-9 months.

**SPECIAL NEEDS:** High Potency formula supports birds that are molting, overweight, underweight, particularly active, housed in a cold climate, recovering from an illness or affected by liver or kidney disease.

Current HBD recommendations: Feeding recommendation Percentages: as there are variances in the literature from well-respected nutritionists, we are saying the following: Pending the NATURAL FEEDING/FORAGING STYLE OF BIRD (i.e. granivorous, vs frugivores, etc.), and individual bird needs (i.e. obesity, etc.).

70% - HBD's formulated diet

25% - Organic dark green leafy, yellow meaty fresh vegetables and low sugar fruits

5% - Organic seeds (hemp, chia, flax, pumpkin, sesame, sunflower) and organic nuts (almonds, walnuts)

Click on photo for more information.

**SOUTH AFRICA’S GAME LODGES and SAFARI ACCOMMODATION**

South Africa is a country where magic infuses the views and landscapes, where the smiles of the local people can only be matched by the splendour of the ocean, mountains, forests, savannahs, waterfalls and rivers. This country is known the world around for its extraordinary collection of fauna and flora, and some of the best places to see these treasures up close are in the numerous game parks, reserves, sanctuaries and national parks.

Game lodges in South Africa range from rustic bush camps that immerse their guests in the wild side of Africa to luxurious 5-star retreats that showcase the bushveld on a platform of opulence. South Africa is known the world around for its abundance of wildlife, not least of all its many birds. In fact, there is an established avi-tourism industry that invites birding enthusiasts from all over the world to indulge in top-class bird-watching.

**SOUTH AFRICA AS A BIRDING HOTSPOT**

Thanks to the abundance of excellent South African hotels and accommodation facilities, as well as an established transport infrastructure (including international car hire companies), South Africa is proving to be one of the world’s top birding hotspots.

Visitors can join up with a formal birding tour group or can explore the country and its species on their own. Of the approximate 850 recorded bird species in the country, around 725 are resident birds (or, at least, annual visitors).

**BIRDER-FRIENDLY ACCOMMODATION**

The following South African birding hotspots feature on our website. Would you like to have a link to your website on these blog posts? All you have to do is to become a Premier magazine subscriber.

# Gulu Private Resort

**1Gulu Private Resort is a privately owned family run Resort in East London. Offering nothing fancy but tasty home cooked breakfast and dinners, clean and cosy accommodation, conference and function facilities all exclusively natural with beautiful garden and river views.**

Unpack your suitcases, put down the laptop, kick off your shoes and enjoy a locally craft beer or a lovely glass of Cape Town’s finest wines. Still need to finalise a few emails? No problem! Make yourself at home on the deck outside the restaurant overlooking the Gulu River or find a garden bench, where you can finish off your day’s work.

Rolo will welcome you to the Resort and he will show you the way to discover “the luxury of being free”.

The complete natural beauty of the location lends itself to all kinds of birds. We have a variety of wild birds, including Hornbills, Sun-and Sugarbirds, Raptors, Water Birds and General Birds. We would like to invite all bird lovers to come and explore our amazing bird species with us.

# Climb Every Mountain, Climb Every Tree

By Rev. Dr. LoraKim Joyner

Early September days in Karasabai, Guyana can have some rain and some heat, but not too much of either. What was abundant a few weeks ago were those who gathered to conserve the endangered sun parakeet. I journeyed to Karasabai with colleagues from the US Fish and Wildlife Service (USFWS) and the US Forest Service (USFS), which both support the parakeet conservation project.

The USFWS offers advice and substantial financial support through the agency’s Caribbean Grant Grant Program (supported by USAID). The USFS lent us two experienced tree climbing instructors who work with the Puerto Rican Parrot Recovery Program. Our collaborative work is meant to help recover the sun parakeet, whose numbers in the wild may only be in the hundreds due to trapping for the wildlife trade.

It is a steep hill to climb to bring this parakeet back to a sustainable level. If anyone can do this, it will be the local parakeet rangers, and they’ll do it by climbing every parakeet roost and nest cavity that they can. But first they have to safely learn how to do so, and this is where Jessica Ilse and Victor Prado-Marcano of the USFS enter the story. They led a 7-day tree climbing workshop in early September that provided the rangers with the necessary skills that will go a long way towards conserving the parakeet and will help other conservation projects in Guyana as well.

Their efforts, along with our supporters and the rangers, means that we can follow every rainbow till we reach our dream – that one day huge flocks of sun parakeets will fly free throughout their once wide range in Southern Guyana.

Climb every mountain  
Search high and low  
Follow every highway  
Every path you know

Climb every mountain  
Ford every stream  
Follow every rainbow  
‘Till you find your dream

(“Climb Every Mountain” from Rogers and Hammerstein’s “Sound of Music”)

# Owl Rescue Centre

All ten bundles of joy rescued from the trade market.

Another day and another Vodacom base station rescue. One day Vodacom is going to call us and say, hey, here's a million bucks, an island holiday and a box of chocolates.

Young lady that we rescued trapped inside a Johannesburg Virgin Active SA gym today.

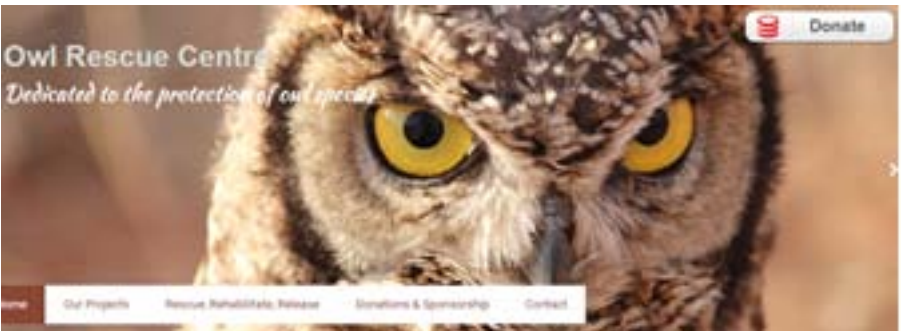

Would be pretty cool if we had Richard Branson 's phone number. We'd definitely call him up and ask him to sponsor her hotel stay, sure he would. The owl even looks like Sir Richard.

## What do you get for the Premier magazine subscription?

1

### 12 Premier Magazine editions

With some exclusive articles.

Fully Printable

Easy Readable on PC and SmartPhone

2

### 12 Free ads, of 10cm x 5 cm

With a hyperlink to your website in the Standard Edition, read by more than 10 000 bird lovers.

3

### Free e-books

Fully Printable

Easy Readable on PC and SmartPhone

4

Reduced prices on the following e-books.

6

A link to your website from our website.

Our website is well established with great reading stats.

7

A link to your website on each page of our website under the section:

### Recommended Websites

8

Your logo in our e-mail signature.

9

Free ad in buy and sell section in Standard magazine.

10

Extra expose in the Standard edition while space last.

11

Reduced advertising rates.

12

### Clubs

When a club subscribe, all club members receive a free e-book of their choice.

13

Extra exposure on social media.

We welcome all subscribers on social media and all posts approved.

Your subscription will make it possible to help a bird conservation organization.

We are now fully PayPal & PayFast verified.
